Office Acti n Summary

U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Application/Control Number: 09/639055

Art Unit: 3634

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4,22, and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Positively limiting of the harness with respect to the shoulder level, shoulder, and back of a user, as set forth in claim 1, renders the claims indefinite.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4,22, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dennington in view of Cox. Dennington shows the claimed harness with the exception of the shoulder straps having resilient portions. Cox in fig.4b shows a harness having shoulder straps having resilient portions to prevent fatigue of a wearer. It would have been obvious to one of ordinary skill in the art at the time the invention was made to

Application/Control Number: 09/639055

Art Unit: 3634

modify the shoulder straps of Dennington to comprise elastic portions as claimed to prevent fatigue of a wearer. To attach the suspender assembly of Dennington to his front left and right shoulder straps by the conventional method of sewing to enable a nonreleasable attachment thereto, would have been an obvious mechanical expedient.

Applicant's arguments filed 4.23.01 have been fully considered but they are not persuasive. Applicant stated that the suspenders are not fixedly attached to the front of the straps 36,38, the examiner disagrees because elements 62 attach the suspenders 18 to the front of the straps at a fixed location on the front of the straps, with regards to claim 3, if a non-releasable attachment of the suspender to the front of the strap was desired, to attach same by the conventional non-releasable method of stitching would have been an obvious engineering expedient. With regards to Dennington and Cox, the difference to be resolved between Dennington and the claimed invention is that of the claimed portions of the shoulder straps. Cox in fig. 4b shows shoulder with the claimed portions, both Dennington and Cox are of the same field of endeavor as the claimed invention, and it is within the scope of one of ordinary skill in the art to appreciate the teachings of analogous art and art of the same field of endeavor to resolve the differences at hand, thus the combined teaching is deemed proper.

2.4

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time

policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

advisory action. In no event, however, will the statutory period for reply expire later than

SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Alvin Chin-Shue at

telephone number (703) 308-2475. A message can be recorded at the above number at

anytime.

The fax phone number for this group is (703) 305-3597.

Any inquiry of a general nature or relating to the status of this application should be

directed to the Group receptionist whose telephone number (703) 308-2168.
